
Clinical data analyst and licensed pharmacist with 14+ years of experience analyzing healthcare data to improve patient outcomes and support enterprise strategy. Previous experiences with business analytics, PBM claims data, and electronic health records. Proficiency with Python, Excel, and SQL to communicate operational and clinical reports.

WORK HISTORY:

Pharmacist/Data Analyst, Blueberry Pharmacy 2020 - Present

- *Data leadership* – Led executive reporting for operational (inventory), financial (P&L reports), and clinical reporting (patient metrics) in aggregate dashboards aggregate from multiple vendor platforms.
- *Pharmacy practice*- Practice in dispensing workflow to support operations, finance, and marketing for the first cost-plus, member pharmacy in the United States for annual, metric-driven growth and to serve more than 9,000 patients (500+ oncology patients), 1,000+ prescribers nationwide.
- *Pharmacy data visualization* – Deploy ETL pipeline for Medicare Part D data using SQL, JavaScript, and Python to identify patterns of impact for generic drug products and inform targeted-prescriber outreach.
- *PBM benefits analysis* – Conduct claims comparisons with deidentified insurance broker medication claims to define potential cost savings by comparing retrospective claims data and current generic drug prices.
- *Digital marketing* - Created and managed website for marketing, membership enrollment, and prescription management for 10,000+ visitors/yr using Linux, MySQL, PHP, and WordPress for content management.
- *Data maintenance* – Update and validate pharmacy cost data on CostPlusPharmacies using Google Cloud Platform, BigQuery, and SQL to maintain real-time medication cost transparency for 10+ pharmacies nationwide.

Lead Innovation Advisor, University of Pittsburgh School of Pharmacy 2016 - 2025

- *Data educator* - Created data science curriculum to teach and mentor 500+ executives, clinicians, data engineers in Python, R, Excel, and SQL to realize the value of data wrangling, machine learning, and data visualization and storytelling in healthcare business intelligence, root cause analysis, and clinical research.
- *Claims analysis* - Analyzed and filtered 25+ million pharmacy claims records in partnership with public insurance payer to identify relevant multiple sclerosis medication utilization patterns of varying member enrollment to determine \$275,000 in cost savings. Cleaned and analyzed dataset using Excel and SAS.
- *Machine-learning application* – Served as clinical expertise in developing machine learning models with data science team using Python and scikit-learn in an iterative approach to predict suicide event risks from medication history in electronic health records data; presented in peer-reviewed, publication .
- *Design lead* - Led design of the first University-deployed mobile application to facilitate the medication reconciliation in the electronic medical record using the Fast Healthcare Interoperability Resources (FHIR) standard in an agile methodology. Coordinate cross-functional team workshop of user acceptance testing to refine the mobile application, raised \$50,000+ in funding, and led to a peer-reviewed publication .

Consultant, Various Companies (selected roles) 2019 - Present

- *Artificial intelligence start-up product strategy* - Serve as improvement consultant to Ziplitics, a generative-AI start-up, by leading comparative effectiveness study design and providing strategic guidance on for product road map for enterprise health system and pharmaceutical clients leading to an increase in signed contracts.
- *Medical information start-up business pivot* – Advised PyrIs, a med-info start-up, through sales strategy conversion from B2C to B2B, enabling rapid user growth to over 40,000 across healthcare and educational markets.

Fellow, UPMC Center for Connected Medicine, University of Pittsburgh 2014 -2016

- *Executive education* – Demonstrated health information technology for an integrated finance and delivery health system through product demonstrations and tours for health system executives, clinician experts, and start-up founders. Reported outcomes to partners whose annual support totaled >\$2 million.

EDUCATION:

University of Pittsburgh	
MBA (Masters of Business Administration) – Certificate: Technology, Innovation, & Entrepreneurship	2022
MS-MIS (Masters of Science, Management Information Systems)	2022
PharmD (Doctor of Pharmacy) – Area of Concentration: Research	2014

PRESENTATIONS: (selected)

Leveraging Artificial Intelligence for Pharmacy, American Pharmacists Association, Nashville TN	2025
Digital Health for Pharmacy, Brazilian Congress of Pharmaceutical Sciences, Foz do Iguaçu, Brazil	2024
Artificial Intelligence for Community Pharmacy, National Community Pharmacy Association, Orlando FL	2023
Digital Health Adoption Momentum Panel Digital Therapeutics Alliance, HLTH 2023, Las Vegas NV	2022

PUBLISHED WORK: (selected)

- Artificial intelligence and the future of the pharmacist’s role in drug information. Lead Author, Published in Amer Journal of Health Systems Pharmacy (2025) [doi: 10.1093/ajhp/zxaf175](https://doi.org/10.1093/ajhp/zxaf175)
- Data Analytics and Insight: Driving Value, Optimizing Utilization, and Improving Overall Performance, Book Chapter in in Financial Management for Health-System Pharmacists; American Society of Health-System Pharmacists (2023) [doi: 10.37573/9781585287130.004](https://doi.org/10.37573/9781585287130.004)
- Toward the Design of Sensing-Based Medication Adherence Aids That Support Individualized Activities of Daily Living. Co-Author, published in JMIR Human Factors (2023) [doi: 10.2196/40173](https://doi.org/10.2196/40173)
- Diabetes Technology: Continuous Glucose Monitoring and the Role of Ambulatory Care Pharmacists. Lead Author, Published in JAPhA Practice Innovations (2023) [doi: 10.1016/j.japhpi.2023.100005](https://doi.org/10.1016/j.japhpi.2023.100005)

LICENSES & CERTIFICATIONS:

Pennsylvania Pharmacy License RP452137 – Active
Authorization to Administer Injectables RPI015264 – Active
LinkedIn Learning Certificate: “Amazon Redshift Essentials” (2025)

SKILLS:

Python, Excel, SQL, Tableau, Data
visualization, Microsoft Office, Design
Thinking, Agile Project Management
